## Are Canada's Workforces ready for the Fourth Industrial Revolution?

The fourth industrial revolution is happening, but is industry ready for it? What exactly is the fourth industrial revolution?

Connectivity, communication and collaboration are the themes of the revolution. The fourth industrial revolution has been labeled the "workforce mobility revolution". Businesses need to give their workforce tools to work creatively, in order to stay ahead of the game.

This is the time business leaders need to reconsider their strategic focus when approaching communication (IT) investment, looking further ahead to relevant and impactful next generation technologies. However, businesses must carefully consider which technology will maximise their investment rather than investing rashly.

Industry is an essential part of the civilization. For the past 100 years we have seen that the world change unrecognisably, as technology has evolved faster and faster. Thanks to advancing technology, our work can be done at any time and from anywhere through Internet access, smartphone and videoconferencing.

Not long from now, advances in machine learning and artificial intelligence (AI) will bring hybrid workforces of humans and machines. Despite this, many businesses are not positioning themselves to maximize its full potential.

Businesses should prepare themselves to consider this emerging new technology to boost their productivity. If they do not, they may fall by the wayside as more tech savvy companies enhance worker productivity and deliver better products and services to their customers.

## What is INTROTEL I-Host Solutions?

I-Host is introtel's cloud based communications solutions offering a combination of smartphones and class-leading Mitel desk-phones. It lets you take work anywhere, anytime.

I-Host is completely customizable and can offer a mixture of CAPEX and OPEX investment to meet your particular budget constraints, all in your own unique solution.

### How It Helps Your Business:

It is scalable both up and down.

When you choose I-Host, you have the choice of whether you make any capital investment, or OPT for a pure cloud OPEX play.

I-Host is cost effective and can reduce your monthly communication bills.

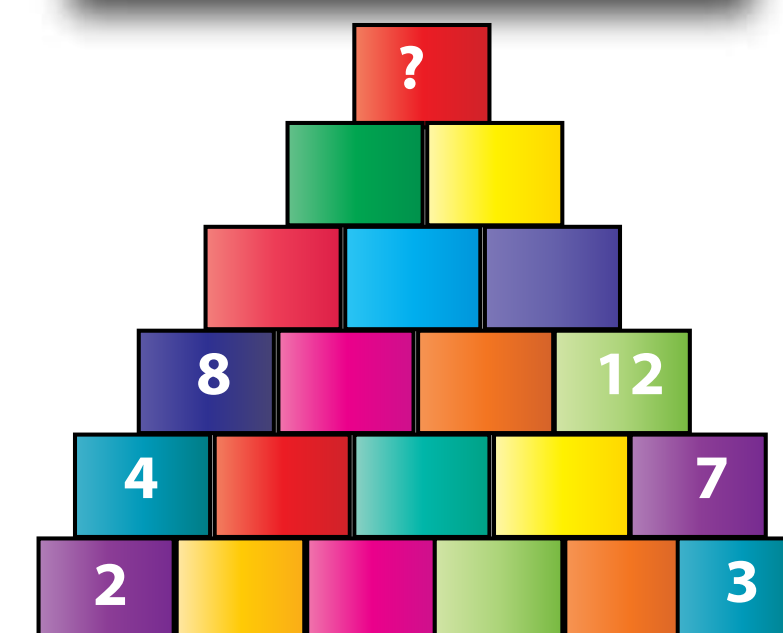

I-Host makes it easy for your customers to reach you anytime, anywhere; Thereby increasing your customers satisfaction and loyalty.

I-Host is completely flexible and we can design a solution including smart phones and desk phones depending on your business needs and user preferences.

### It's Time For Brain Teaser :

The object of this brain teaser is to figure out what would be the top number in the pyramid.

The answer will publish in the next newsletter.

But, if you want to know the answer now you can e-mail us at [mrahman@introtel.com](mailto:mrahman@introtel.com) and we will be happy to provide you the answer.
